THE WOOD SHOVEL AND TOOL COMPANY

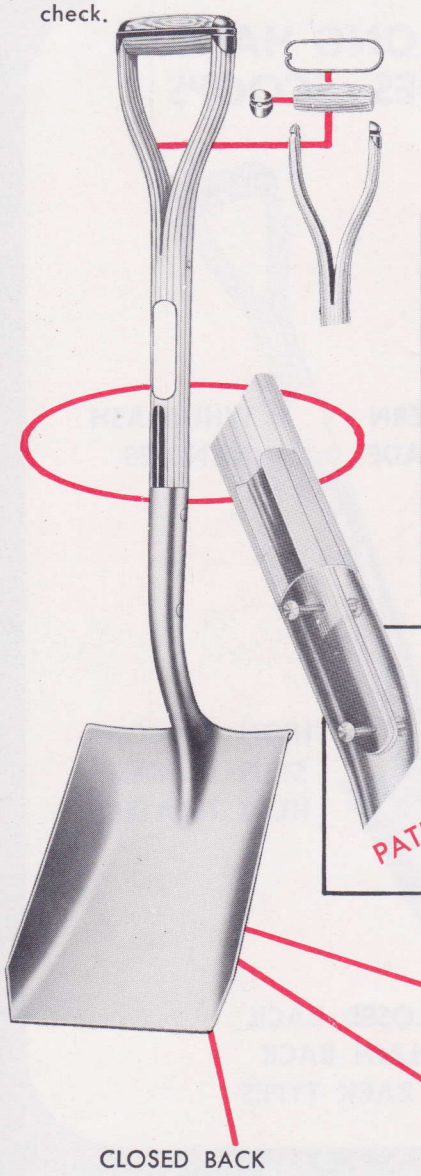
FORM NO. A 107 LITHO IN U.S.A.

PIQUA, OHIO, U.S.A.

WOOD brand

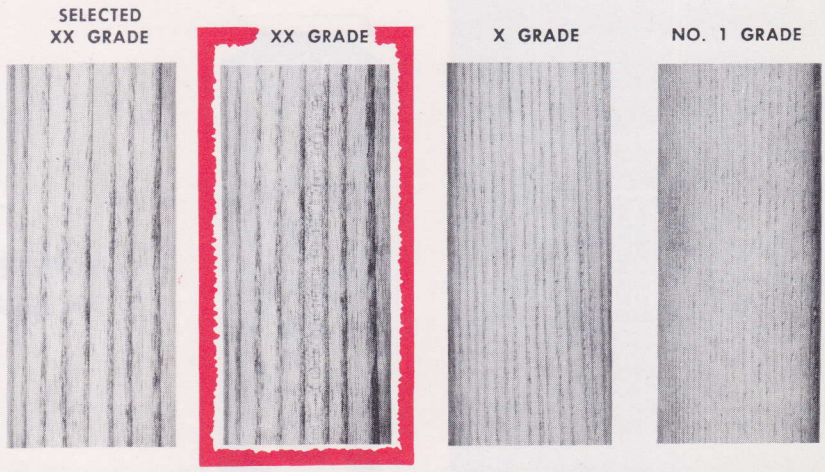
MOLY D HANDLE STEEL BANDED

Wood's Moly D Handle is wide and comfortable to the hand. It is stronger than ordinary handles, and won't work loose, split, or check.



Tough, Slow-growing Northern White Ash

Wood's handles are made of clear, straight grain second growth Northern White Ash. The timber is kiln dried in our own plant, with care to prevent case hardening or checking. The handles are graded, and the grade used in this brand is boxed in red below.



STEEL I-BEAM HANDLE REINFORCEMENT

over 50% stronger than plain handles

Wood's steel I-Beam insert adds 50% more strength at the point where 65% of all handle breakage occurs.

The two-piece reinforcement is riveted solidly through the blade socket, but flanged around the handle above the socket, giving added strength without sacrificing resiliency or spring.

PATENTED!

YOUR CHOICE OF BLADE CONSTRUCTION

Shovels and spades are manufactured in Closed Back, Plain Back, and Open Back Types. Scoops are furnished in Open Back type only. The Closed Back construction incorporates the best features of all three types:- Smooth back, rolled shoulders, I-beam reinforcement, and straight shoulder chucked handle which makes rehandling easier.
